

IN THE CLAIMS:

Please amend claims 1, 3-6 and 8-10 as set forth in the complete listing below. Please cancel claims 7 and 12. This listing of claims will replace all prior versions and listings of claims in the application:

1. (currently amended) A method for the storage, organization, indexing, retrieval, and display of information comprising the steps of:

selecting one or more substantially flexible indicia from an indicia source, each of said indicia having indicia information to be displayed and indicia information to be concealed;

selecting one or more substantially rigid holders from a holder source, each of said holders having holder information to be displayed and holder information to be concealed;

applying one or more of said indicia to each of said holders, to form a combined indicia and holder;

selecting a display from a display source for each of said holder selected, wherein said display comprises a pocket portion and at least one flap tab portions,

inserting said combined indicia and holder into said pocket portion of said display, displaying said displayed indicia information and displayed holder information, and

manipulating said at least one flap tab portions alternately to reveal or to conceal releasable, reusable adhesive portions on each of said at least one flap tab portions.

2.(Previously Presented) An information organization and display product, comprising:  
an indicia selected from an indicia source;

a holder unit selected from a holder source;

and a display unit made from clear plastic material, having a pocket portion and one or more ~~indexed~~ tab portions, selected from a display source, whereby the indicia is placed in a suggested manner against the holder unit and the indicia and holder unit are inserted into the pocket portion of the display unit, such that the indicia is displayed.

3. (currently amended) An information organization and display product according to claim 2, wherein said indicia comprises two distinct fields, a displayed indicia field and a concealed indicia field, separated by a ~~two lines, a dashed line, a shaded field, or small print~~.

4. (currently amended) An information organization and display product according to claim 2, wherein said holder unit comprises a rigid material ~~folded once at fold line~~, with a concealed holder field ~~on back portion~~ and a displayed holder field ~~on a folded portion~~.

5. (currently amended) An information organization and display product according to claim 2, wherein said display unit comprises two sheets of flexible, clear plastic material, with front sheet and rear sheet permanently bonded at first side edge, bottom edge, and second side edge forming a pocket for insertion of indicia and display; wherein top edge of front sheet and top edge of back sheet are not bonded and a plurality of flap tabs are permanently attached to the unbonded edges, said flap tabs are flexibly attached to the top edge of the display pocket and comprise a seam separating the front and distal portions of said tabs with a releasable adhesive applied to ~~both sides of~~ distal portions of said flap tabs.

6. (currently amended) An information organization and display product according to claim 2, wherein said display unit comprises two sheets of flexible, clear plastic material, with front sheet and rear sheet permanently bonded at ~~top edge, first side edge and bottom edge and second side edge, and top edge and first side edge~~ is open, forming a pocket for insertion of indicia and display; wherein ~~second top edge and first~~ side edge of front sheet and ~~second top edge and second~~ side edge of back sheet are not bonded and a plurality of holes are punched on the unbonded edges of second side, and said first side contains a plurality of embossed index tabs along the edge.

7. (Herein Canceled).

8. (Currently Amended) An information organization and display product, comprising:  
an indicia selected from an indicia source;  
a holder unit selected from a holder source;  
and a display unit made from clear plastic material, having a pocket portion, unbonded on at least one side and one or more tab portions, selected from a display source, whereby the indicia is placed in a suggested manner against the holder unit and the indicia and holder unit are inserted into the display unit, such that the indicia is displayed.

9. (Currently Amended) An information organization and display product according to claim 8, wherein said indicia comprises two concealed indicia fields adjacent to the top and bottom edges of indicia, such concealed indicia fields are separated from displayed indicia fields.  
~~by a line, a dashed line, a shaded field, or small print.~~

10. (Currently Amended) An information organization and display product according to claim 8, wherein said holder unit comprises a rigid material ~~folded once at fold line~~, with two die cut tabs cut into the holder.

11. (Previously Presented) An information organization and display product according to claim 8, wherein said display unit comprises two sheets of flexible, clear plastic material, with front sheet and rear sheet permanently bonded at first side edge and bottom edge, leaving second side edge and top edge open for receiving the combined indicia and holder; wherein top edge of front sheet and top edge of back sheet are not bonded and a plurality of index tabs are permanently attached to the first side edges.

12. (Herein Canceled).
